

MUZZLES

FLIGHTS believes in the use of a basket muzzle for its greyhounds, so much so that one is provided as part of the adoption fee.

The use of a basket muzzle is not cruel nor is it a punishment.

*It's design inhibits the wearer from nipping or biting other animals or people.

SLOW

! Using a muzzle is extremely important if your new canine companion is stressed or when meeting other pets/small animals as its response can't be predicted.

The muzzle is:

- 1 A preventative
- 2 A safety tool
- 3 Easy to use

The basket muzzle should be used on your hound when in the yard or other areas while interacting with other dogs, especially at first.

Greyhounds can be nippy when playing or running and you don't know how your resident dogs could react to this.

A basket muzzle can also be used to inhibit destructive behaviour that may be harmful to your hound, such as chewing electrical wires, wooden furniture, etc.

The muzzle is a tool you can use to safeguard your new greyhound, until you know how your hound is settling into its new home.

Having your greyhound wear the provided basket muzzle will reduce these risks.
